LIEVERS LTT

VIBRATING TABLES.

To compact prefabricated concrete elements like blocks, stairs, floors etc., in all kind of sizes and dimensions, Lievers produce a wide range of vibrating tables with a sturdy and rugged construction.

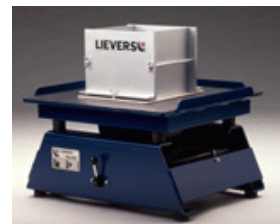

These vibrating tables are used in the concrete industry and suitable for working under the most severe circumstances.

They are available in electric, HF 42V/3-phase/200 Hz, 230V/single phase/50 Hz, 400V/3-phase/50 Hz or with pneumatic external vibrators. All electric models are equipped with a thermal overload relay and if required, with frequency variator.

For the compaction of concrete cubes/cylinders in laboratories or buiding sites, Lievers produce a 400 x 400 mm vibrating table with a 230V/1-phase/50 Hz external vibrator.

This machine is very handy, simple to use and provides perfect compaction results.

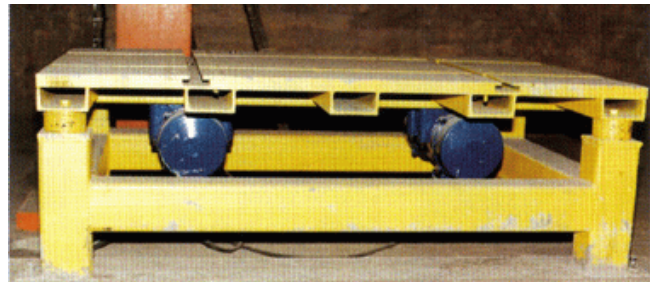

All sizes and norms of cube- and cylindermoulds can be fitted on the tabletop which is covered with a rubber mat.

Standard tables in our program:

Table top size: 400 x 400 mm.
800 x 800 mm.
800 x 1200 mm.
1200 x 1800 mm.

Of course we can offer all other dimensions on request.
